1. **Purpose - To provide funds to the Office of Security for conducting security probes against our domestic field installations.**
2. **Description of work or service required.**

During Fiscal Year 1964 it is anticipated that approximately 36 CI type security probes will be directed against our domestic field activities and other areas in which we have an interest or are desirous of testing the security. The purpose of these probes is to assess the general security capabilities of the suppliers with whom we are doing business and to test our own (Agency) security capabilities within the structure of these companies. They are also designed to test the effectiveness of the security of our domestic field installations and to obtain a sampling of the attitude of the general public in the immediate areas of these installations, as well as the attitude of the contractor and Government personnel employed on the periphery of activities in which we have interest.

3. **Expected additional or related work. None**
4. **Total estimated cost.**
5. **Source of funds.**
